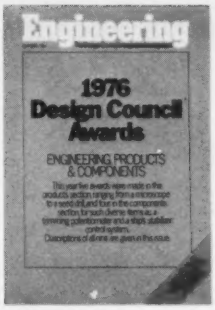
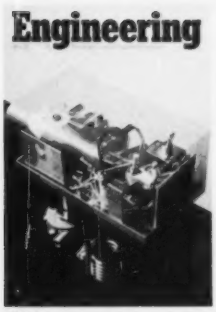
JANUARY
The engineering specialists
Taking care with asbestos
Bigger valve, better engine?
Machines & mechanisms
Real ability shows up in detail design
Bring back the toroid
Technical file No 25
Cams and Followers

FEBRUARY
Cross channel viability of SRN 4 owes much to BR's in-service development
10 ways not to design a drill jig
Points for plant safety
New designs – new products – the experience of national laboratory
Communication – the key to successful design
There is no academic route to design capability – practice must be the teacher
Technical file No 26
Precision moulding

MARCH
Single-point mooring needs two-way design support
Adhesive bonded joints
Electronics in the context of design
What are spiroid gears?
Microprocessors offer free bonuses for the designer
10 ways not to design a relay circuit
Design contractor zooms up market
[illegible] lata and estimation of [illegible] transfer between intermittently contacting solids
Technical file No 27
Corrosion control



APRIL
1976 Design Council Awards – Engineering Products and Components
Plant hazards
Orbital power unit
Minimization in digital design
10 ways to help corrosion
Nomographs for impact stress calculations
Technical file No 28
Universal Joints



MAY
1976 Design Council Awards for Medical Equipment and the British Motor Vehicle Industry
10 ways not to use flexible shafts
Cushioning the ride in deep-sea drilling
Business jet
More than meets the eye
Engineering science versus technology
Technical file No 29
Underwater equipment design

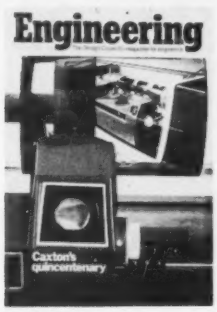
JUNE
Energy
Latent economics
The use of solar energy in Britain
Rotary re-generators
Conservation
A vertical axis-windmill
10 ways not to use earth-leakage breakers
Mass produced dingies
Testing for an earthquake environment
Highway control
Technical file No 30
Moving part logic

JULY
Bogie structure design must be right
The 'Flywheel effect' in clutch design
Dynamic positioning – cutting the errors
Tolerances tamed
Channel plates
Plastics optics
10 ways to take advantage of plastics
Technical file No 31
Shot peening

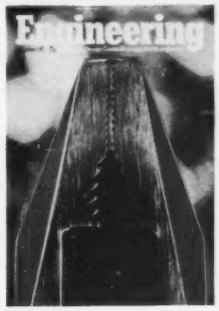
AUGUST
Engineering design must start in the schools
Removing worries about units
10 ways not to cool electronic equipment
Designing with plastics
Analysis of a complex structure
Design for coach safety and other needs
Technical file No 32
Threaded fasteners for sheet materials

SEPTEMBER
MACH '76: Tools for economic take-off
PEMEC: All for the factory
SUBCON: A new platform for small industries
Patents, whats the point?
Trends in design
10 ways not to test a welded joint
Ceramics in turbine design
Europe's Airbus – the world's quietest and most fuel-efficient wide bodied airliner
Vibrators
Technical file No 33
Hopper feeders

OCTOBER
Sheffield enterprise
Using flexible metallic tubing
Internepcon 76
Available engineering expertise
Detecting porosity
Materials costs trends favour metal forming
Designing for production
10 ways to design a difficult-to-jig component
Designing never starts with designing
Technical file No 34
Flexible shafts



NOVEMBER
Designing for reliability
Remote video monitoring systems
10 ways to use grain flow in forgings
Applying the heat pump
Training opportunities and company needs
All quiet at public works
Caxton's quincentenary
Diamonds on test
Technical file No 35
Flexible foam plastics



DECEMBER
The generation game
Hand tools
Electrical connectors
Apprentice draughtsmen:
10 ways not to design for grinding
Dimensional analysis of swirl atomisers
Technical file No 36
Machinery guarding
